EMPLOYEE FINISH DATES

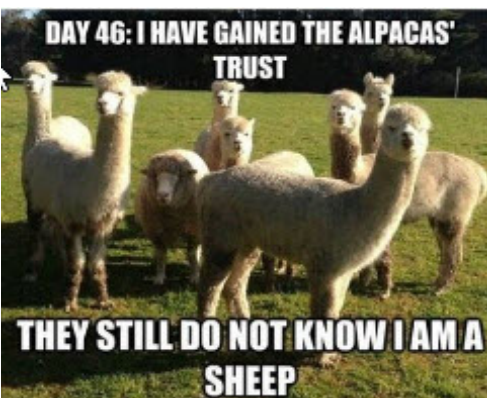

When an employee leaves your employment it is important to enter a Finish Date on their employee record.

Details	
Ird Number	123123123 Weekly
Commenced	1/01/2015 Finished
Tax Code	M Withholding Rate 0.00%

This will terminate their contract terms and make them inactive on your database.

By default they no longer appear on IR filing or “Inquire look up” screens unless stipulated in the dropdown boxes as highlighted below (*Active or All*)

Code	AARN
	All Employee's by Code
	All Employee's by Code
	All Employee's by Surname
Display	ACTIVE employees By Code
	All Employee's by Code

OFFICE STUFF

What's been Happening

Six months into the year and a lot has been happening. In May we attended the NZ Shearing Association Conference in Queenstown and the Australian Shearing Association Conference in Adelaide. Both were very informative and great to meet up in a social environment. Thank you all.

USER GROUP CONFERENCE

We are planning to have a two day user group get-together in October this year discussing the software, training, your wish-list for improvements, and so on. There will be some fun stuff too. Why not plan a weekend away and combine the two before the busy summer season kicks in.

Venue—Cromwell
Dates—Oct (to be confirmed)

Installed vs Cloud

There has been much discussion about Cloud-based vs Installed Software. With the popularity of cloud software and it's high growth rates, it was thought that traditional installed software would disappear. This is not the case and here are some reasons why we are here to stay.

- **Accessibility**
Access is available at anytime irrespective of internet connectivity.
- **Control**
You control your data, your back-ups, and your security.
- **Speed**
As fast as Internet connections have become, they still don't match the speed

of a local area network (LAN—within an office or home environment)

- **Functionality**
Many installed products offer feature flexibility, integrated automation and a richness of functionality that is not easily reproducible in many Cloud products.

As developers we see new Cloud models emerging and envisage greater crossover between the two. As such, we continue to provide you the best software solution for your business with all PAYBIZ offers.
